DETAILED ACTION

1. Claims 1 and 6-10 are pending. Applicant cancelled claims 4, 5, and 11-26. It is noted the Abstract needs to more accurately reflect the claimed invention.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites numerous first, second and third processors. No such support is found in the specification. Also, from lines 9-10, the phrase “using the bar code reader to generate a first signal identifying a product selected by the customer” is not supported in the specification, e.g. page 18. As is, this renders the claim indefinite. Further, there is no correlation with the above enumerated processors and the drawing figures. As is, these issues render the claims not clear.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1 and 6-10, as understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Schulze, US 6,497,360 or Williams, US 5,815,657.

Schulze discloses a checkout system, e.g. cols. 4-8, 10, generating signals corresponding to a price adjusted purchase and a processor that receives signals and generates signals corresponding to an offset of funds between manufacturers and retailers, and a first manufacturer having a computer system using a customer card including a length and value characteristic.

Williams discloses a system and method comprises reading a first signal, e.g. report data, sent to a desired location second signal, e.g. printer, path/file name, on an on-line web site, e.g. col. 17, lines 26-33, col. 33, lines 59-61.

6. Further pertinent references of interest are noted on the attached PTO-892.
